

EcoConsulting Expert

Mohamed Mortada

Biography

After completing his Bachelor's Degree in Architecture in 2015, from the Lebanese American University, Mohamad began working at EcoConsulting as a Sustainable Design Architect in 2016. He specializes in sustainable design and green building certifications, with over seven years of practical experience in the field. He is also a certified Circular Economy Specialist from the Circular Economy Alliance.

Mohamad is an accredited LEED Green Associate and has worked on more than 30 green certified (LEED or BREEAM) and uncertified projects and eco-building competitions. His work involves providing detailed advice on energy-efficiency, insulation, low-impact materials, resource efficiency, and health & well-being in buildings. He is also a certified Construction Product Life Cycle Assessment Specialist.

Mohamed has been involved in developing content for Environmental Awareness & Climate Action education curriculum for Youth, both for UNDP and UNICEF. He is also a lecturer at the Circular Hub, and has been involved in delivering numerous trainings, workshops and talks related to green buildings, climate change, circular materials, and sustainability.

In his spare time, Mohamad likes to draw, play and create board and video games. He is currently working on assembling a new type of tricycle and making mud bricks, he also has a special interest in human-powered devices and machines. Moreover, Mohamed is a regular volunteer in Abtal El BiA, the Environmental Championship Program for kids developed by EcoConsulting and implemented under the Lebanon Mountain Trail Association Education Committee, with kids in public and private schools.
